SUMMARY

Software Engineer with experience in backend development, cloud platforms, and API design. Strong interest in distributed systems and enterprise applications. Comfortable working in agile teams and building scalable web services.

EDUCATION

University of Manchester

BSc Computer Science, Relevant coursework:, Data Structures & Algorithms, Cloud Computing, Database Systems, Software Engineering 2017 – 2020

EXPERIENCE

Software Engineer

TechNova Solutions

June 2022 – Present

London

- Developed REST APIs using Node.js and Express
- Worked on cloud deployment pipelines using AWS and Docker
- Integrated third-party services into internal platforms
- Optimised database queries improving performance by 30%

Junior Developer

BrightEdge Digital

July 2020 – May 2022

Manchester

- Built frontend components using React
- Assisted in backend development using Node.js
- Maintained internal tools and bug fixes
- Participated in code reviews and agile sprints

PROJECTS

Cloud File Storage System

- Built a secure file upload and storage system using Node.js
- Implemented authentication and role-based access control
- Deployed using Docker containers

API Monitoring Dashboard

- Created a dashboard to monitor API latency and uptime
- Used Express backend with React frontend
- Integrated logging and alerting system

TECHNICAL SKILLS

JavaScript / Node.js

REST APIs

SQL / PostgreSQL

Docker

AWS (EC2, S3)

Git / GitHub

Agile Development

CERTIFICATIONS

AWS Certified Cloud Practitioner

Node.js Developer Certification (OpenJS Foundation)

ADDITIONAL INFORMATION

- Open to relocation - Eligible to work in the UK and EU - Fluent in English
